**AFFORDABLE HOUSING
IN VANCOUVER
IS EVERYONE'S BUSINESS**

The Community Builders Network is increasing the number of affordable rental homes in Vancouver through a strategic combination of private investments, innovative social services, pro bono contributions from a wide range of professionals and the power of community participation. A zero sum approach balances tenant income with capital and operational expenses. Strategic capital investments create low-cost rental housing without a reliance on public funding. New homes are sustained indefinitely with cost-effective operations and the spirit of community living.
